PARTS OF THE BODY.

MODELS THAT ARE USED IN THE STUDY OF ANATOMY.

They Are Taken From Subjects In the Morgues and Hospitals of Paris and Are Colored Exactly to Represent Nature.

In the window of an oculist up town is a display which is gaudily fascinating. It is composed of paper mache representations of parts and organs of the human body, colored similar to nature. Some are life size, such as a pair of lungs and a stomach, but others, an eye and an ear for instance, are large enough to have belonged to the giant who was knocked out by Jack. A weird model of a head demonstrates unpleasantly how you would look if your skin were peeled off your face. Every vein and nerve and muscle is carefully outlined and colored. A figure displaying the entire interior of a torso, colored to represent nature, shows us that all sorts of tints go to make us up inside. One is apt to think of oneself as being of one harmonious red interior, but this is all wrong, it appears.

Studying these figures sets one wondering where they come from and who models them. It would be an assumption congenial to few, one would suppose. A questioner who enquires to the door for a moment courteously answers a lot of questions asked by an inquisitive person.

"These models," said he, "are all made in Germany and France. There are none made in this country. Yes, the manufacturer's assistants make their originals in clay, working directly from subjects obtained in hospitals and morgues. Azot of Paris is the largest manufacturer of this line of goods. They make models of sections of animals also. For instance, we now have an order for a deer. Come inside and let me show you more of the things." A glass case in the rear of the store was filled with all sorts of parts of all sorts of animals, human and otherwise.

"Isn't this a beautiful helmet?" said he enthusiastically, exhibiting a life size organ of paper mache, divided up into little blazed parts and colored red and tan and pink and blue. "It sells for \$8. A little throat, similarly colored and divided, would cost you \$8 if your fancy ran to that kind of hole-brace. A beautiful little bit of mechanism composed of paper mache, bone and wire, illustrating the nerves connecting the tongue with the ear and various intricate muscular arrangements you can buy for \$2."

There was a shelf full of brains and another full of animals' legs and stomachs and livers and things. Altogether it was a pretty bloody looking kind of show on account of the quantity of red paint used to illustrate large sections of muscle. Then standing up in one corner was a life size figure of a man composed of innumerable separate pieces, so that any part could be taken off and individually studied. One side demonstrated the muscle formation and the other the veins and nerves and arteries. This figure can be bought for \$500 by one who wishes such an ornament.

Then there were genuine skulls and skeletons. The French excel us also in the preparation of human bones for the market. An articulated skull of American workmanship would cost \$9. A skull of French articulation was priced at \$25, and the work was admirable. All the cost delicate little bones were carefully preserved and arranged, and it was subdivided into many small parts, held together with tiny brass hinges. The teeth of the skull was sawed evenly off, so as to form a sort of cap, but the other openings seemed irregular and dovetailed. This was explained thus:

"Do you know how they separate a skull into its various parts? Well, we pack it full of sawdust, which they then wet. The sawdust expands and bursts the skull apart along its natural joinings or sutures. These are then hinged and wired, as you see. It all requires most delicate manipulation by an expert. Thimond of Paris is the leading artist in skulls and bones. The business of modeling these paper mache organs and of articulating bones is not an overcrowded one, as there is not a large demand for such things. Schools and colleges are the chief buyers of the articles. There are precious few students, as you may imagine, who can afford to invest so much money in models for private study."

Any hearts and lungs and livers that come to this country other than by way of the large office, it may be added, must pay 40 per cent duty to Uncle Sam—New York Commercial Advertiser.

"Ah, to see the moon at a distance of one mile," was the note left by a Paris suicide explaining his motive for death.

MUCH IN ONE NAME.

SHAKESPEARE'S QUERY SATISFACTORILY ANSWERED AT LAST

The Manager of a Lumber Yard Company Uses His Ears and Eyes to Advantage and Discovers a Source of Profit in Nomenclature.

"Is his name George?" asked the manager of the Wilmett Lumber company. "If so, I'll engage him. If not, I won't."

"What has his name got to do with it?" the inquirer wanted to know.

"It has got a lot to do with it. Look at that list of yards and the men in charge of 'em. Eighteen yards, every one run by a man named George and every one prosperous and getting more prosperous."

"All of which you attribute to the fact that the yardmen are all named George?"

"Not entirely, but to a certain degree. Take a good, jolly, friendly, compa-

Beautiful Women

There are few women as beautiful as they might be. Powder and paint and cosmetics don't make good looks. Beauty is simply an impossibility without health. Beautiful women are few because healthy women are few. The way to have a fair face and a well-rounded figure is to take

Bradfield's Female Regulator

This is that old and time-tried medicine that cures all female troubles and weaknesses and drains. It makes no difference what the doctors call the trouble, if there is anything the matter in the distinctly feminine organs, **Bradfield's Female Regulator** will help and cure it. It is good for irregular or painful menstruation; for leucorrhœa, for falling of the womb, for nervousness, headache, backache and dizziness. Take it and get well. Then your old-time girlish features and figure will be restored.

Sold by druggists for \$1 a bottle.

THE BRADFIELD REGULATOR CO.

ATLANTA, GA.

"THEY'D ROLL 'GEORGE' AROUND."

iable man and give him the name George, and you have a man who can sell the farmers lumber to beat the band. Let him have all these qualifications except the name George, and he can't sell more than three-quarters as much.

"When I was a boy on the farm, I noticed how folks positively delighted in saying George. That's my name. In talking to me they'd repeat my name in every sentence. It was 'Good morning, George.' 'Is your father well, George?' 'And your mother, George?' 'Got a good crop of wheat, George?' Some ever kept saying Charlie or Jim or any other name over and over again 'till that."

"They'd roll George around in their mouths as if it tasted good; seemed as if they had a big mouthful of something good to eat—something warm and wholesome—turkey and dressing and mashed potato; seemed as if it puffed out the cheeks, filled their whole mouth and made 'em feel good."

"A hungry looking farmer would meet me on his way home to dinner, stop and say George a few times, and the hungry look would fade out of his face, and he would go off as cheerful as if he had just had something to eat."

"About five years ago I sold a scientist what I have been saying, and he said he didn't believe it was all fancy, by any means. What he said was, in substance, about as follows:

"In uttering the word George the mouth is distended as it is by few other words—certainly no word in common use. With the average person the only other thing that so distends the mouth as the word George is a big mouthful of food. The muscular sensation is the same in each case."

"Along with the taste of a big mouth telegraphed to the brain by the nerves goes the sensation of distension of the mouth. The two are closely associated. You can't have a big mouthful of food without distension. You can't have distension without the big mouthful and it telegraphs to the brain a feelings satisfaction, as of the mouth full of food."

"Since then I have engaged no yardmen unless they were named George. My business is twice as prosperous as it was five years ago. Why, the saving in treating alone is an item. We used to have to spend some money in judgments treating. That is now pretty well

THE OYSTER SEASON.

The oyster in his bed of ooze,

waked with a start from his summer snooze,

Opened his shell, and said, with a yawn:

"I tell you, our son of safety is gone;

For many pleasant dreams were disturbed by the jar."

That is always caused by the letter R.

And I know by the keel of that hideous slop."

That some of us shortly will be in the soup!"

And so they will for the slop was filled with the finest and fattest. This slop was sent out by Nick Aposte and these choice oysters are now for sale, done or raw, ready to chow at his restaurant. You can get them by the plate, dozen, hundred, barrel, dray load, wagon load or car load. Owing to the rush of business the serving of regular meals will be discontinued after this week, but special orders will be served at any hour of the day or night.

Don't buy anything in furniture or house furnishings until you have seen Marston & Finch's stock.

Their prices are low; their stock is complete, and they will sell you what you want on long time.

\$50 REWARD.

The Board of Public Instruction of Escambia County, Fla., offers a reward of fifty dollars for the arrest,

with evidence to convict, of any party or parties, who maliciously

break into a school building, break

the locks, shoot or break the window

lights, knocks down fences, gates,

water closets, water pipes, etc., in

any portion of the county.

IT'S DELICIOUS.

George, and I've thought of calling him George, after you, George! There's a plate of beans, cold cabbage and head cheese in that last sentence.

"Why, man, George is a verbal free lunch. Take an example from contemporary events. Anybody shouting for Fred Funston, Bill Shafter, Win Schley, Rich Hobson? Nobody at all! But everybody saying George Dewey. Our George, all except the ultra elegant who never take large mouthfuls even when nobody is looking at 'em. They say 'Admiral Dewey' and 'the gallant admiral'—Chicago Tribune.

China artists cannot paint an animal without making a caricature, whereas their flower pictures are not only true to life in form and color, but show a loving study of detail.
